Question One

- What is YUM and DNF?

Reading

- DNF is the New Default Package Manager Of Fedora 22

Question Two

- What is a packet manager?

Question Three

- Fedora is the free version of what?

Question Five

- What is the command to install DNF?

Question Four

- What does DNF stand for?

Question Six

- If I wanted to install a package named "cutedoggame" what would the command be?

Question Seven

- If I wanted to remove the package `cutedogggame`, what would the command be?

Question Nine

- What are the two sections in the configuration file?

Question Eight

- In what folder is the DNF configuration file located. Hint, in Linux folders are indicated by `/etc/var/www` which means the `www` folder is inside the `var` folder which is inside the `etc` folder.

Question Ten

- What are two other package managers that are mentioned in the last paragraph (besides YUM and DNF).
